of requirements. Total sales of stocks Saturday aggregated 139,116 shares. An active business was done on the Stock Exchange during the two hours' trading and was well distributed throughout the district. There was some London selling at the opening in St. Paul, Louisville & Nashville and Atchison, the latter giving way only 1/8, but the others receding %. In the early dealings speculation was weak and a fractional decline took place. The depression was of brief duration and prices soon took an upward turn under the leadership of Chicago Gas, which, after a decline of 1/2, sold up 31/3 on covering of shorts. Distilling was bought on the advice of President Greenhut, of the trust, who asserted that the recent decision against the trust is of great importance. The improvement in the rest of the list was merely fractional. Toward 11 o'clock the upward tendency was checked by the inauguration of a selling movement in Chicago Gas, which was based on fears that the Attorney-general of Illinois will decide against the company in the quo-warranto proceedings. Before the botwas reached stock had declined 2 per cent., with only a rally of 4c at the close. The break in Chicago Gas had the effect of weakening the entire market, and the general tendency was downward up to 12 o'clock. Some of the specialties meanwhile made material advances, but in the main the market was heavy at the close. Compared with the closing figures of Friday, prices were irregular. The changes, however, are very narrow, the declines being within a fraction, while only in one case was there an advance over a fraction. Susquehanna & Western preferred, showing a gain of 1%. WEEKLY FINANCIAL REVIEW. Henry Clews says concerning operations in Wall street last week:

"During the past week business at the Stock Exchange has been influenced to some extent by realizing transactions. Stocks bought in anticipation of the veto of the Bland bill have been sold out, by both home and London holders; and, in the absence of any new stimulus, some of the large operators have been waiting for prices to droop previous to buying in again. There has been the more readiness to take this course because Congress had to take action upon the President's veto. and it was not unanimously regarded as entirely certain that the bill would fail to become law through a two-thirds vote. Discouragement in some quarters has arisen also from the growing conviction that the tariff discussion is likely to be prolonged until near the end of May, which may have the effect of keeping certain branches of business for the fall trade in suspense, and therefore act unfavorably upon some mercantile interests. One favorable indication from Washington is that nothing further is likely to be seriously attempted in the way of urging free coinage upon Congress. Senator Stewart's bill is regarded as likely to be shelved in committee or allowed to rest on the table, and it seems possible that the silver party may deem it impru-dent to incur further odium by wasting time on measures which the President will not allow to become law. Should Mr. Bland carry out his threat to introduce a free coinage bill, it is likely to be dealt with very summarily, as the House is

anxious to get at other business. "Nevertheless, the continued silver crusade has a silently unsettling effect upon confidence. There can be no doubt that, in the West, Southwest and South, the feeling in favor of increased issues of silver is gaining ground rather than abating; and, unless something is done to mollify that feeling, it may later on assume more threatening dimensions. Among two-thirds of this inflationist class, however, the demand

SOME HEAVY TRADING | upon a basis of guarantee which, while absolutely secure, would yet not be oppressive solutely secure, would yet not be oppressive or prohibitory of issues, capable of expansion according to the requirements of business, and available to the State banks on the same terms as to the national. Such a plan is now ready for introduction to the House, and there is a probability of its being not only supported by party leaders, but also favored by the administration. The passage of such a measure, though not at the moment needed for currency necessities, would yet have the effect of getting the constantly disturbing money question out of the way, and-which is even still more important-also of depriving the silver agitators of two-thirds of their present support, and finally of removing this dangerous issue from the field of

'While the immediate course of the market probably suggests discrimination in buying, still the distant future is brightening. A more hopeful spirit pervades business circles, and as soon as general trade resumes normal activity railroad earnings must improve. Thus far net earnings have been sustained only by the strictest economies, and in this respect at least the depression has proved a timely lesson to railroad managers. The advance in wheat will at 61% per ounce; at London, 28 3-16d. create a better feeling in the Northwest, because the damage by the late cold snap was not serious, and is not likely to cause any material shortage. The advance in silver is also calculated to lessen the gloomy spirits of the West. When Congress settles the tariff question business will unquestionably experience a sharp revival, but this longed-for result is still about two months distant at the earliest. Meanwhile, The banks now hold \$80,797,782 in excess | the market will have its setbacks, but they will not be serious, and in the long run prices must advance."

LOCAL GRAIN AND PRODUCE.

Trade of the Week Disappointing, with Few Important Changes. Wholesale men speak of the trade of the first week in April as having fallen below expectations. The weather has been unfavorable to spring business. Retail merchants in all lines are not disposed to stock up ahead, being confident that prices, if they do not go lower, will not advance | east steel, 8c; tire steel, 2%@3c; spring steel, any. Hog products are still on the decline and selling much lower than in April, 1893. In staple groceries prices carry a steady tone, but there are no indications of any marked advances in the near fu-Dry goods in nearly all lines are easy in tone, and concessions, even on the present low prices, are made to sell good bills. Eggs are steady, shippers paying about 714 cents per dozen. Poultry and butter are both weak at quotations. Irish potatoes, oranges and bananas are all higher than a week ago. Onions and cabbage are easier. Strawberries are arriv-ing more freely and are lower. New tomatoes are still in light supply, with prices so high that the demand is light.

The local grain market was more active yesterday; bidding on corn spirited. Wheat was off 1/2c, while several grades of corn advanced 1/2c and all grades of oats were higher. Track bids ruled as follows: Wheat-No. 2 red, 57c; No. 3 red, 54c; rejected, 40%50c; wagon wheat, 56c.

inflationist class, however, the demand means more money rather than more silver. They are asking for more silver because, in demanding that expressly they have the influential backing of the mining interest proper. But at the same time, they would be equally willing to accept some other form of currency instead, providing it were placed within their reach. It is, therefore, of the utmost importance that Congress should, during the present session, pass a bill authorizing issues of bank currency.

REACTION IN WHEAT

Follows Report of Better Prospects for the Coming Crop.

Loss of 11-4c on the Day in the Leading Cereal, with a Decline in Corn-Provisions a Trifle Firmer.

CHICAGO, April 7.-It was a weather market in wheat, with variegated crop reports thrown in. The majority of the crop reports received to-day made quite light of crop damage and the trade gave ear to that version of the story. The feeling was heavy, and while trade was light, there was less timidity shown by short sellers. At the close May wheat showed a oss of about 14c. The spread between May and July is now 14c. Corn was weak and left off with a loss for the day of %c. Oats were firm for near deliveries and weak for the more deferred. Provisions were in the main quite firm. After the close of the regular session of

pit was at 64%c, with some little as high as 641/2c. The market kept steady at 641/4c for a time, but there was some nervousness on the part of the longs as the sellers appeared to be acting with much confidence. There were light rains in northeastern Kansas, with an indication of those spreading, and a majority of the crop reports which came in were inclined to minimize the amount of the damage done by the freeze. Foreign news was not encouraging, inasmuch as the great recent strength of the market here had only caused about 1d advance at Liverpool. From Frankfort, Ky., the reports were that the damage was being greatly magnified, and a dispatch from a farmer who works an extensive area near Louisville was that there was no damage of any extent. Missouri wired that it was raining there to-day, and that the wheat prospects were fine. Other reports from many widely scattered localities were in a similar strain, and the market ruled weak in consequence. An attempt to sell 300,000 bushels by George Baldwin resulted in a drop from 641/4c to 633/8c in less than two minutes. As soon as the last ten thousand bushels of the lot referred to were sold, and the crowd saw there was no more to follow, the price dropped again to 631/sc. After that and up to the close, business was dull, but the tendency continued to be toward a lower level. There was another drop which carried the price off to 64%c, followed by 64%c, followed by a reaction to 63%c, and the latest transactions were at that pric.. There were more sellers than buyers at that as the bell tapped. Corn opened 1/201/4c lower than it closed yesterday and in the course of the day declined %c more, and closed at a loss of %c. Receipts were not heavy to-day and still lighter are expected for Monday. Trade in the pit was light, without any prominent transactions on either side of the mar-

While only a limited amount of business was transacted in oats the market remained firm. The cause of this strength is probably due to the effect of the crop reports which have brought in a great many buying orders. May closed at an advance of 1/8c over yesterday's latest quotation. Trading in provisions was without spirit, and of moderate volume. Prices were firm at the opening, but were followed by a period of weakness induced by free offerings of lard by Catlin, White and others. On an attempt to buy at the slight decline occasioned by the selling of lard the market ruled firmer and prices advanced beyond yesterday's closing prices and rested with a slight advance. Compared with last night May lard is .021/2c higher and May ribs .071/2c higher.

Estimated receipts for Monday are: Wheat, 50 cars; corn, 195 cars; oats, 120 cars; hogs, 32,000 head. Leading futures ranged as follows:
